## About the College

The College was established in the year 2006 by the "Hyderabad Mahila Vidya Sangham" to provide education to girl students. The college is self-financed, approved by PCI, AICTE and affiliated to Osmania University. The College is organizing seminars, guest lectures and workshops in various disciplines which is a continuous process to impart knowledge and skills necessary for Pharmaceutical Education, Research and Development.

## Vision

To be a national women pharmacy professional leader in transforming lives through innovative, vigorous and compassionate approach to Pharma education

## Mission

RBVRRWCP preparing and empowering girl students by providing continuous awareness programmes to succeed in changing world apart from regular curriculum

## About the Conference

The conference is aimed at creating awareness to the faculty research scholars and students of the life sciences on Recent Advancements in Pharmaceutical Research.

Machine Learning (ML) Techniques improve the decision-making in pharmaceutical data across various applications like QSAR analysis, hit discoveries, Denovo drug architectures to retrieve accurate outcomes. In clinical trials, absolute and methodological data must be generated to tackle many puzzles in validating ML techniques, improving decision-making, promoting awareness in ML approaches, and reducing risk failures in drug discovery.

Pharmaceutical analysis is a process that is used for detection, determination, separation, purification, and structure elucidation of a given compound that is used in the formulation of pharmaceutical substances.

This conference mainly concentrates on recent advances in the instrumental techniques for the trace analysis of toxic compounds in food and geological samples, to maintain a healthy life style.
