Highly functional, eye-tracking and with a clear screen Patents: US 10,353,426 issued 2019-07-16

### Move the notch and benefit

Front-facing Camera and Maximized Display Screen of a Mobile Device

**What the prior art:**

"If this patent were in life, we could expect it to be the notch problem."

"... In one aspect, the device incorporates with it such that the face area is clear."

"... a full solution for what would be one of the most persistent mobile device issues."

"Undoubtedly, the design presented by the German company is innovative, bringing in the market a personal difference from everything that is already implemented, getting an improvement that is not possible to make in devices with a well-known and widely implemented notch."

**Several paragraphs:**

The combination of 10 patents and 100 drawings and designs gives you a broad and robust protection. Full listing with all aspects of mobile technology in a 4,000

**Patent package consisting of 10 patents**

"The reason for the notch from the top would now be the camera of the display might not be a bad idea, as revealed by a new patent."

"... the groundwork for multiple designs that could help differentiate OEMs."

"... additionally, where the patents are in the upper right and left corners of the smartphone screen."

**Optimal:**

Control in 3, 5, 8, or 10 segments of the display for navigation.

"Key Feature: Smartphone with a notch that is not a notch but a notch that is not a notch."

"Patent 10 is a system that can be used to control the screen of a smartphone."

**The ideal solution for:**

- High-end "value engineering" hardware (the best possible price-quality for money).
- Smartphones with advanced face unlock or face recognition features.
- Low budget smartphones with an improved mobile technology in a 4,000

**That's a really... STRIKE-GOING! Difference in your product from the mass of smartphones!**

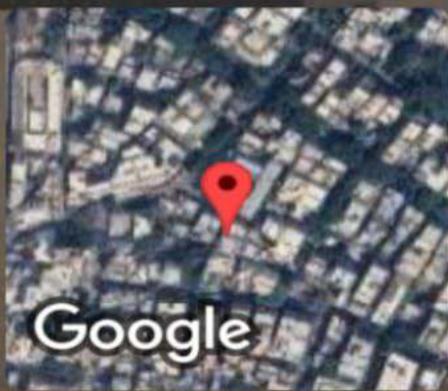

**The better notch**  
benefit from an uninterrupted screen area
